- ◆ Uses combination of vendor and proprietary Stoltenberg internal training
- ◆ Designed to make resources new to HIT productive quickly
- ◆ Partners can access these developed resources for temporary or permanent placement

connect with us:   

Stoltenberg Consulting Inc., a leading healthcare information technology consulting firm, solves bigger business problems than just implementing software. We understand the process not just the system.

Stoltenberg Consulting behaves differently, simplifying healthcare technology decisions by

- ◆ listening - aligning client needs with the right consultants
- ◆ evaluating those needs and recommending solutions and options - whether technology, process, staffing and/or systems - consistently proactive on the client's behalf
- ◆ providing vendor assessment and selection support - always taking ownership in client outcomes

Stoltenberg Consulting's team then provides strategic, comprehensive, tailor-made guidance and on-site support to maximize the system, applying application and process redesign expertise from our bench strength. Our flexible, results-based contracts focus on the client and your goals - maximum productivity to increase revenue and improve patient care.

Let our expert team of consultants - averaging more than 15 years of hands-on healthcare experience - simplify healthcare technology for you!

Client comments about Stoltenberg Consulting...

"Stoltenberg has brought the highest quality resources to our projects. No matter the task, the breadth of knowledge they are able to provide has made them an asset in both project implementation and support roles. Working with our vendors to resolve issues and meet project deadlines, they have demonstrated they are our (Aptium's) advocate."

Lydia Rodriguez
Director of Patient Management
Aptium Oncology

"Our CIS pilot initiative has been a complete success and Stoltenberg has been no small part of that success. We look forward to a continued and long relationship with Stoltenberg Consulting."

Randy Carpenter
Chief Information Officer
HealthSouth

"Stoltenberg Consulting prepared such a thorough assessment of what the OAS Gold project would entail prior to the start of the project that I felt comfortable that they would meet USA's objectives. ON-site coding and support through the entire project kept my programming staff up to date with the work being done as it was done. Stoltenberg's presence at weekly staff meetings with the hospital implementation team (consisting of both nursing and HIS representatives) in a training room environment kept the hospital team constantly involved with testing and analysis and their questions were answered. This led to a timely implementation with no surprises along the way. Stoltenberg did a nice job of documenting all modifications to the system. I look forward to working with Stoltenberg Consulting in the future as new projects are implemented for the USA hospitals."

Susan Ankersen
Director, Information Systems
University of South Alabama

"Working with Stoltenberg has assisted URM/Strong Health in transitioning the current 3270 based CPOE system to the browser based OAS Gold system that the providers have been begging for. The Stoltenberg consultants assigned to the project were knowledgeable and diligent in keeping the project moving forward in a timely manner. Having them on site each week has assisted in the knowledge transfer necessary for the permanent staff to continue to enhance and maintain the system."

Dawn Robinson
Clinical Systems Manager
University of Rochester Medical Center

"I want to thank you for providing some of the best consulting services that I have ever retained."

Ty Knox
Clinical Systems Manager
Johnson City Medical Center
